Academic Calendar Overview

The academic year for ICT Class 10 runs from June to March, divided into two major phases: the Teaching Period (June to January) covering the complete syllabus with mastery-level depth, and the Revision Period (February to March) dedicated to board examination preparation and final consolidation.

Teaching Period

The teaching period spans 8 months from June to January. With 12 periods allocated per month, the total comes to 96 periods. This time is utilized to cover the complete syllabus across 6 chapters at a mastery level, along with practical laboratory sessions. Emphasis is placed on in-depth understanding, problem-solving, and application-oriented learning to prepare students for board examinations.

Revision Period

February and March are dedicated to comprehensive revision, intensive practice with previous board exam papers, model test examinations, and final preparation. Students revisit all chapters, strengthen weak areas through targeted practice, and build confidence for the board examinations.

Monthly Teaching Plan

June	Ch 1: Advanced Programming Functions, File handling, Exception handling, Object-oriented concepts, Modular programming, Project work	12 periods 3 lab activities
July	Ch 2: Data Structures Arrays, Lists, Stacks, Queues, Dictionaries, Trees, Graphs, Sorting and searching algorithms, Time complexity	12 periods 3 lab activities
August	Ch 3: Database Fundamentals Database concepts, Normalization, Tables and relationships, Queries, Forms and reports, SQL basics, Advanced queries	12 periods 2 lab activities
September	Ch 4: Web Technologies HTML5, CSS3, JavaScript basics, Responsive design, Web page structure, Hosting and publishing, Web safety and ethics	12 periods 2 lab activities
October	Ch 5: Algorithms Algorithm design, Flowcharts, Pseudocode, Divide and conquer, Greedy algorithms, Dynamic programming, Computational thinking, Big-O notation	12 periods 3 lab activities

November	Ch 6: Emerging Technologies Artificial intelligence, Machine learning basics, IoT concepts, Cloud computing, Blockchain fundamentals, Ethics in technology, Digital citizenship	12 periods 2 lab activities
December	Board Exam Revision - Chapters 1 to 3 Concept review, Previous board question analysis, Practice worksheets, Lab re-runs, Doubt clarification, Problem-solving sessions	12 periods 3 lab activities
January	Board Exam Preparation - Chapters 4 to 6 and Overall Previous board papers practice, Model tests, Lab viva preparation, Final revision, Exam strategy and time management	12 periods 3 lab activities

Assessment Schedule

The assessment structure follows the continuous and comprehensive evaluation (CCE) pattern with Formative Assessments (FA), Summative Assessments (SA), Unit Tests, and Laboratory Examinations.

Assessment	Month	Marks	Topics Covered
FA-1	July	30	Ch 1: Advanced Programming
Unit Test 1	July	10	Ch 1: Advanced Programming
FA-2	September	30	Ch 2 & 3: Data Structures, Database Fundamentals
Unit Test 2	September	10	Ch 2 & 3: Data Structures, Database Fundamentals
SA-1	October	40	Ch 1 to 4: Half Yearly
Lab Exam 1	November	20	Practical: Ch 1 to 4
FA-3	November	30	Ch 5 & 6: Algorithms, Emerging Technologies
Unit Test 3	November	10	Ch 5 & 6: Algorithms, Emerging Technologies
FA-4	January	30	Ch 5 & 6: Algorithms, Emerging Technologies
Unit Test 4	January	10	Ch 5 & 6: Algorithms, Emerging Technologies

SA-2	February	40	Ch 1 to 6: Annual Board Examination
Lab Exam 2	February	20	Practical: Ch 1 to 6

Resources and Materials

The following resources are required for effective delivery of the ICT curriculum for Class 10 at the mastery level:

- **Textbooks:** NCERT ICT textbook for Class 10, KREIS supplementary ICT workbook, Board exam preparation guide
- **Software:** Python 3.x, Scratch 3.0, LibreOffice Base, LibreOffice Writer, LibreOffice Calc, VS Code, Web browsers (Chrome/Firefox), Database management tools, Online IDEs (Replit, Trinket)
- **Hardware:** Desktop computers or laptops (minimum 1 per student), projector and screen, speakers and headphones, internet connectivity, USB storage devices
- **Laboratory:** ICT laboratory with adequate power supply, UPS backup, networked computers with domain login, wall charts displaying Python syntax, algorithm symbols, HTML tags, and database schemas
- **Reference Materials:** KREIS ICT teacher handbook, previous year board examination papers (2018-2025), solved board exam papers, online coding platforms, Python documentation, W3Schools web development tutorials, KREIS practice question banks

—

Note: This year plan is designed for **Level 3 Mastery / Board Exam Prep** focus. The curriculum emphasizes in-depth understanding of programming concepts, advanced data structures and database management, comprehensive web development skills, and algorithmic thinking, preparing students for board examinations and higher secondary ICT studies.
