Academic Calendar Overview

The academic year for ICT Class 9 runs from June to March, divided into two major phases: the Teaching Period (June to January) covering the complete syllabus, and the Revision Period (February to March) for consolidation and examination preparation.

Teaching Period

The teaching period spans 8 months from June to January. With 12 periods allocated per month, the total comes to 96 periods. This time is utilized to cover the complete syllabus across 6 chapters, along with practical laboratory sessions.

Revision Period

February and March are dedicated to comprehensive revision, practical re-runs of all experiments, and intensive examination preparation. Students revisit all chapters and strengthen their understanding through problem-solving and lab practice.

Monthly Teaching Plan

June	Ch 1: Advanced Programming Functions, File handling, Exception handling, Object-oriented concepts, Project work	12 periods 3 lab activities
July	Ch 2: Data Structures Arrays, Lists, Stacks, Queues, Dictionaries, Sorting and searching	12 periods 3 lab activities
August	Ch 3: Database Fundamentals Database concepts, Tables and relationships, Queries, Forms and reports, SQL basics	12 periods 2 lab activities
September	Ch 4: Web Technologies HTML basics, CSS styling, Web page structure, Hosting and publishing, Web safety	12 periods 2 lab activities
October	Ch 5: Algorithms Algorithm design, Flowcharts, Pseudocode, Problem-solving strategies, Computational thinking	12 periods 3 lab activities
November	Ch 6: Emerging Technologies Artificial intelligence, Machine learning basics, IoT concepts, Cloud computing, Ethics in technology	12 periods 2 lab activities

December	Revision - Chapters 1 to 3	12 periods
	Concept review, Practice worksheets, Lab re-runs, Doubt clarification	3 lab activities

January	Exam Preparation - Chapters 4 to 6 and Overall	12 periods
	Previous year papers, Model tests, Lab viva preparation, Final revision	3 lab activities

Assessment Schedule

The assessment structure follows the continuous and comprehensive evaluation (CCE) pattern with Formative Assessments (FA), Summative Assessments (SA), Unit Tests, and Laboratory Examinations.

Assessment	Month	Marks	Topics Covered
FA-1	July	30	Ch 1: Advanced Programming
Unit Test 1	July	10	Ch 1: Advanced Programming
FA-2	September	30	Ch 2 & 3: Data Structures, Database Fundamentals
Unit Test 2	September	10	Ch 2 & 3: Data Structures, Database Fundamentals
SA-1	October	40	Ch 1 to 4: Half Yearly
Lab Exam 1	November	20	Practical: Ch 1 to 4
FA-3	November	30	Ch 5 & 6: Algorithms, Emerging Technologies
Unit Test 3	November	10	Ch 5 & 6: Algorithms, Emerging Technologies
FA-4	January	30	Ch 5 & 6: Algorithms, Emerging Technologies
Unit Test 4	January	10	Ch 5 & 6: Algorithms, Emerging Technologies
SA-2	February	40	Ch 1 to 6: Annual Examination
Lab Exam 2	February	20	Practical: Ch 1 to 6

Resources and Materials

The following resources are required for effective delivery of the ICT curriculum for Class 9:

- **Textbooks:** NCERT ICT textbook for Class 9, KREIS supplementary ICT workbook
- **Software:** Python 3.x, Scratch 3.0, LibreOffice Base, LibreOffice Writer, LibreOffice Calc, VS Code (basic), Web browsers (Chrome/Firefox), Database management tools

- **Hardware:** Desktop computers or laptops (minimum 1 per student), projector and screen, speakers and headphones, internet connectivity, USB storage devices
- **Laboratory:** ICT laboratory with adequate power supply, UPS backup, networked computers with domain login, wall charts displaying Python syntax, algorithm symbols, and HTML tags
- **Reference Materials:** KREIS ICT teacher handbook, previous year question papers, online coding platforms (Replit, Trinket), Python documentation, W3Schools web development tutorials

—

Note: This year plan is designed for **Level 3 Application** focus. The curriculum emphasizes applying programming concepts, working with data structures and databases, and building practical web development skills, preparing students for higher secondary ICT studies.
